Abolishment Of Secret Meets Is Voted Down

Councilman Elmer A. Martin made a strong effort at the meeting of the city council last night to abolish the "star chamber" sessions, claiming they were un-American and undemocratic, that the public was entitled to have its business transacted in the open, and further that spectators were entitled to have the meetings opened promptly at 8 o'clock but the effort was unsuccessful. It was decided by a vote of six Harold Skow and Louis to three that "star chamber sessions" should continue.

The motion to abolish the "secret" sessions was made by Councilman Martin and seconded by Councilman John N. Hartnett. After some discussion the roll was called and the vote stood as follows:

Against "star chamber session": Hinkley, Martin, Hartneit. For "star chamber sessions":

When the routine business of the session was concluded last night Councilman E. A. Martin took the floor and stated that he had been considering for some time what he deemed a matter of importance not only so far as the members of the council were concerner, but as it affected the interested people of the city.
"I have some idea on the sub-

ject, which is the holding of "star chamber sessions." I do not believe in them and have never believed in them. They are not American and are not democratic. We appear here as the representatives of the people and we should transact their business in the open and not behind closed doors.

"We are supposed to meet here each Monday night at 8 o'clock," this is the first time months that we have been able to meet on time. Residents of the city come here expecting this body to be in session at the appointed hour, but they remain in the corridors, wait until they are discussed and then go home.

"That is the reason people de not attend these sessions. If you (Continued on Page 5)

MEDICAL CRIMINOLOGIST

We very much prefer the medical attentions of Dr. Herman Bundeson, the new Chicago coroner, to the problem of settling the gangster's hash, to the sloppy folk who claim that the crook is only a sick man, requiring treatment rather than punishment. Dr. Bundeson, who has started out to solve by scientific means, the origin of the gang murders of St. Valentine's Day, is as consistently sane a public official as we have had the pleasure of observing for a long time.

Science, not sentiment, will be needed to curb crime. If that science could be applied to jury material, in the way of giving intellingence tests, some of the sorry sights of our courts could be eliminated and the murderer, the payroll robber, the embezzler and the swindler would begin to drift into steadler and safer occupations. Disgust with the manner in which criminals evade and escape the law is growing to the point where martial law and vigilante vengeance is being hinted, if not seriously discussed. And in due time that debate will swing to the conduct of jurymen who seem to lose all sense of proportion the moment they take their oaths.

Dr Burdeson came to this country as a lad from Germany. He has had excellent training in his profession. The first big achievement he made was to make Chicago one of the healthiest cities in the United States. He saved the lives of thousands of babies by conscientious and comprehensible instruction to young mothers. He is a keen psychologist who believes that one little slogan that impresses the public is better than a whole treatise in such medical terms that the reader is frightened or diverted from the real purpose of the teaching. Here are some of his slogans:

"Health habits are more easily caught than taught."

"Greatest Health is greatest wealth."
"Shutting the windows keeps in the hold-up man who steals your health."

"A breast fed baby is the best fed baby."
"Eat right, sleep right live right, think right,

and you'll be right."
"Your belt line is your health line."

Now that this remarkable man has turned his talents to crime inquiry we may live to see the day when Chicago will be morally as well as physically a clean city.

BETTER SHORTCAKE

Indications are that last year's record strawberry crop will be exceeded this spring. This is great news for as William Butler described by Roger Willams as "one of the chefest doctors of England," said three centuries ago, "Doubtless God could have made a better berry, but doubtless God never did."

The department of agriculture is trying to introduce some South American berries of a species with which this country is not acquainted. Great expectations are entertained for them. But it is a fairly safe assumption that no new berry will displace the strawberry in national affection. The increasing size of the crop reflects increasing demand,

which is due to enhanced appreciation of the fruit. The nation's shortcake, a correspondent says, apropos of the huge crop in sight, is to be the biggest on record. But it not only will be bigger but better.

CARTER'S INTEPILLS

Beneath the stylish hood of this new HUPMOBILE.... is a new style motor.

... asking only for protection from carbon forming oils

A NEW style in motors has swept the A automobile industry. High-compression motors, powerful, speedy, economical, add emphasis to the outward beauty of modern cars.

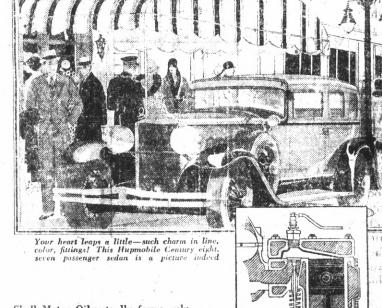

Hupmobile Century sixes and eights" mong the most striking this year and their motors are worthy of the hoods that house them.

But today every car owner faces a problem. Not a fault in his car—rather a fault in the oil he uses. Many oils form quantities of hard carbon. It is bother-some and has to be removed even from old cars. In high-compression motors it becomes a real danger because pistons almost touch the cylinder head. Where would you put a quarter-inch layer of coke-like carbon?

Hard carbon causes more damage than many of us realize. Chips get under valves bilding them open to warp and waste power Gritty bits grind and chafe through moving engine parts.

However, there is an answer: Word has gone out among lubrication experts -word about a new motor oil that solves the carbon problem.

Shell Motor Oil actually forms only 1/3 to 1/5 as much carbon as even the most expensive oil you can buy! The little it forms is only soft soot that blows easily away.

The new high-vacuum refining process by which Shell Motor Oil is made produces a finer lubricant, too. One that is remarkably resistant to heat; it holds its body long after ordinary oils break down.

Thus in Shell Motor Oil you get two vital things. First, freedom from hard carbon, secondly a marvelous lubricant.

Fill with it regularly.

Furned always for stamina, Hupmobile has more than kept its pace. New Hup mobile motors are high-compression of

rourse-modern engines must be! And high-compression means no room for hard carbon-use an oil that forms none

This measure has been surrounded by secrecy such as was never maintained before about a matter of this importance, but enough has leaked out to provoke criticism from both industrial interests and farmers and foreign quarters.

The measure is the result of on the committee by President Hoover for only a "limited re-vision." About a third of the rates have been changed in the Fordney-McCumber act of 1922, the last tariff act.

Bill Fought
Farmers have learned that while the committee has raised agri-cultural rates generally, the ad-vance in some cases is not as much as they had expected. Similarly, industrial rates have no been raised as high as many manufacturers had hoped. Ex-pressions of dissatisfaction are heard at the capitol from Pennsylvania and Massachusetts in dustrial perresentatives.

These are but advance indica tions of general comment that will begin to buzz about noon when the bill is introduced for-mally by Chairman Hawley of the committee, and made public. Cuban sugar interests will continue their fight against an increase in the House.

Reprisals Seen
A strong influence in keeping many rates down was the resentment of foreign nations. Reprisals have been threatened. The most embarassing situation is that involving Canada, since a project dear to President Hoover's heart the Great Lakes-St Lawsheart, the Great Lakes-St. Lawrence waterway, may be delayed by Canada if tariffs are raised unduly. South American nations, too, are protesting against in-

creases .

The tariff battle, like the farm relief battle, will be fought out in the Senate. Administration forces are strongly entrenched in the House and are set to carry out President Hoover's wishes for limited revision: But in the Senate this limitation will be con-tested vigorously.

Councilman A. L. Paulsen: I disagree with Martin. If the business of the city is done in the open it will cause a great deal of trouble. We do not want meetings like they hold in El Cerrito. I believe a person can talk with more feeling and more freely in the back room. If I said some-thing that one of the newspapers did not like, they would come out with a big headline about it. To come out here and thresh out some mat ters, particularly affecting the location of industries would be waste of time, and harm would result.

Mayer Mattle A. Chandler: have been on the council for five years and I want to say that the members of this council are giving the best there is in them to the community. The \$50 a month we receive does not any where near pay us for the abuse we receive. As for the 'star chamber" sessions I think they should continue, as there are problems that come before us that should be discussed in secret. To give out all the information, and broadcast it, concerning industries that want to locate in Richmond would be ill advised. I am sure this body is willing to come out in open session prompt ly at 8 o'clock. Special Meetings

Councilman Martin: In the past few months there have been doz-ens of meetings of this body held with the chamber of commerce, and matters affecting industries discussed. Special meetings can be called for such purposes. I am still firmly convinced that the major portion of the business that comes before the "star chamber sessions" could be discussed in open meetings. Most of the work of this council is done by committees, and the abol-ishment of the "star champer" sessions, would not in any way interfere with committee work. You Are Wide Awake Now

If You Slept Well Last Night

F DURING every hour you spent in bed last night, your body was resting peacefully and quietly; if minute by minute waste was cast off and vitality poured in; then every hour of today will be active, energetic and productive because you are wide awake.

The world needs wide-awake men and women and gets too few of them because there are few who sleep well. A good mattress can do much toward perfecting your sleep. There are mattresses so made that sleep comes quickly and cannot be driven away easily. They take the body and deliver it to the merciful ministration of Sleep that drives out the poisons of fatigue and replenishes the vitality so necessary for our wakeful hours.

We have such mattresses. Perhaps yours is the bed that needs one most. Come in during Better Bed-ding Week and we'll be glad to demonstrate for you.

SANDMAN MATTRESS

The manufacturers of this comfortable medium-priced mattress specialize in Kapok (commonly called silk floss) mattresses. A well constructed Kapok mattress is worthy of consideration in selecting a quality mattress because the fibers of this material are soft and buoyant and will not become packed and hard at any time during the life of the mattress.

JOHNHOEYMATTRESS

over fifty years the name of John Hoey & Co. has been allied with Better Bedding right here in our bay region. From the smallest crib pad to th newest in spring built mattresses this complete line represents only the best in material and workmanship, and satisfaction is assured any customer makig a selection from this custom made line.
